

NGUYEN THANH DAT

DATA ANALYST

Chanh Phu Hoa Ward, Ho Chi Minh City

(+84) 866 010 744 | datnguyen03.ba@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

SUMMARY

Data Analyst with practical experience in **SQL, Power BI, Python, and Excel**. Capable of **cleaning, analyzing, and visualizing** data to uncover insights and improve business performance. Detail-oriented, analytical, and eager to apply data skills to solve real business problems and grow in a professional environment.

EDUCATION

Eastern International University (EIU)

Mar 2026

Bachelor of Business Administration - Business Analytics

- Honors Program
- Dean's List Scholarship, GPA 3.65/4.0
- Fully Funded Academic Field Trip – Singapore (2025)

WORK EXPERIENCE

Industry 4.0 Innovation Center (IIC 4.0)

Jul 2025 - Sep 2025

Business Analyst Intern • Team Leader

Researched Electricity KPI Standards

- Researched and compiled a list of international KPI standards on electricity usage applied in advanced countries for monitoring and maintaining consumption at the optimal level
- Recommended the Dev team to collect the relevant data to analyze and identify classrooms that exceed the acceptable electricity consumption threshold
- Based on the findings, visualized processed data into an effective real-time dashboard on Power BI

Standardized HVAC Process and Wrote Its Regulation

- Collaborated with team members to develop standardized operating procedures (SOPs) for the HVAC system, ensuring smooth and efficient operation as part of the new Sustainable Building Management System (SBMS)
- Worked closely with the team to establish and document a clear protocol outlining the responsibilities of each department during system malfunctions to guarantee timely resolution

UNIVERSITY PROJECTS

Eastern International University - Strategic Business Analytics

Feb 2026

Capstone Group Project - FoodCity (Business Partner) - Team Leader

- Collaborated with FoodCity stakeholders to define project objectives and identify operational pain points within a 10-week timeline
- Structured business problems into analytical tasks, coordinated team execution, and tracked project progress
- Integrated operational datasets, developed key measures, and built a Power BI dashboard to evaluate business performance and operational limitations
- Analysed customer survey and operational data to deliver 3 strategic recommendations for business improvement
- Contributed to project outcomes, including a 10% increase in profit margin, increased customer traffic, and improved customer satisfaction

Eastern International University - Business Data Management

Aug 2025

Final Group Project - Data Bank (#8weeksqlchallenge) - PostgreSQL

- Developed and executed advanced queries to answer 13 analytical questions in Customer Nodes Exploration, Customer Transactions, and Data Allocation Challenge
- Implemented Common Table Expressions and Window Functions to enhance query capability and accuracy
- Optimized data processing efficiency and streamlined analysis workflow through structured query design

Eastern International University - Data Visualization

Jun 2025

Final Group Project - Human Resource - Power BI

- Applied fundamental DAX functions, including aggregate, logical, and date & time functions, to perform accurate calculations and enhance data analysis
- Developed interactive dashboards presenting executive summaries such as total employees by region, gender, and education level
- Delivered workforce performance reports across business units and analyzed turnover rate trends by year, age group, and department
